

## Instructions for Using SPOTLess hc®

SPOTLess hc aids in the removal of many unidentified & combination stains including:

**Oily Foods  
Cosmetics  
Inks  
Embedded Soil  
& Grime  
Unknown Stains**

SPOTLess hc is safe to most fabrics and colors. If colorfastness is questionable, test garment in a hidden area.

### **Pre-Treat Soiled Areas. Simply Spray, Wait a Few Minutes, Then Clean**

1. Use the 32 oz. SPOTLess hc spray bottle to apply full strength. Do not dilute. Completely saturate the area needing treatment.
2. Areas of heavy soils such as hemlines and around pockets may require tamping.
3. Allow SPOTLess hc several minutes to work.
4. Do not flush. Dryclean as normal.

### **Use at the Spotting Board to Remove Stains**

1. Apply SPOTLess hc directly to the fabric and completely saturate stained area.
2. Work the stain gently with spatula or by lightly tamping with a dry-side brush.
3. When soil is loosened or removed from fabric, continue with the drycleaning process. SPOTLess hc is designed to remain on the fabric prior to drycleaning, so that you can machine-rinse spotted garments. Therefore, do not flush, rinse or dry prior to drycleaning.

### **Control Moisture During Drycleaning (Leveling)**

The problems caused by drycleaning fabrics that contain moisture from pre-spotting can be overcome by using SPOTLess hc. Using a technique called leveling, it works by controlling the moisture that remains from wet-side stain removal procedures after the spotted area has been rinsed and air-dried with the spotting gun.

1. After using any wet-side stain removal agent AND after fabric has been rinsed and air-dried with the spotting gun, apply SPOTLess hc liberally to the pre-spotted areas. This will control moisture that may remain in the fabric.
2. Lightly tamp the wet area, including fabric area just outside of ring. Do not flush, rinse or dry.
3. Dryclean as normal.

### **Add An Extra Boost to Heavily Soiled Loads (Batch Method)**

For extra cleaning power for loads of heavily soiled garments, add SPOTLESS hc at a rate of 3 to 6 oz. per 10 lbs., depending on the degree of soil.

*Note: For additional water-soluble soil removal, combine 5 parts SPOTLess hc with 1 part water. Use as directed above. Do not add water to loads containing soft wools or cashmere.*

### **How to Order SPOTLess hc**

SPOTLess hc is sold by authorized Street's distributors everywhere. Order SPOTLess hc from your local distributor in single one-gallon containers or in cases of four.

Specially labeled spotting and spray bottles are available from your distributor.

*Before using any chemical product, review the Material Safety Data Sheet (MSDS) for safe handling and proper disposal.*

*For professional drycleaning use only.*
